

DATA SHEET

Bonding plates

Material:

Polyethylen (PE), recycled

PVC-, CFC- and HFC-free

Product information :

Bonding plates for fastening of screw sleeves on the formwork and for protection of threads.

Bonding plate diameter of 49 mm for a stable hold on formwork.

Disc height of just 4,5 mm offers a low installation height, especially when concrete covers are low.

Small openings at the bottom side for an economic use of adhesive consumption.

Packaging units and dimensions available:
